Complete the question set

1 1 point

You have a `CompanyName` column containing:

- `ABC Corporation`
- `Green Energy Ltd.`
- `Bangkok Water Co.`

You want to create a new column containing only the **first word** of each company name. Which Excel feature can automatically recognize the pattern after you provide an example?

Pick a choice:

- ◯ **Remove Duplicates**
- ◯ **Flash Fill**
- ◯ **Go To Special**
- ◯ **Conditional Formatting**

2 1 point

In a PivotTable, a numeric variable such as Revenue is commonly placed in the **Values** area when the goal is to calculate a summary such as Sum or Average.

Pick a choice:

- ◯ **True**
- ◯ **False**

1 point

3

A PivotTable has:

- Rows: Industry
- Columns: Region
- Values: Sum of Carbon Emissions

What does each cell of the PivotTable represent?

Pick a choice:

- **Number of companies in an industry only**
- **Average carbon emissions for the entire dataset**
- **Total revenue for an industry–region combination**
- **Total carbon emissions for an industry–region combination**

1 point

4

In XLOOKUP, which argument specifies the range containing the values that should be searched for the lookup value?

Pick a choice:

- **search_mode**
- **return_array**
- **lookup_array**
- **if_not_found**

1 point

5

A statistically significant p-value at $\alpha = 0.05$ means that the null hypothesis should be rejected when $p < 0.05$.

Pick a choice:

- **True**
- **False**

1 point

6

You have several Excel files containing the same columns and structure, such as `CompanyID`, `Year`, `Revenue`, and `ESG_Environmental`. You want to combine all files into **one dataset** in Power Query. Which approach is most appropriate?

Pick a choice:

- **Merge Queries**
- **Append Queries**
- **Group By**
- **Pivot Column**

1 point

7 Which area of the **Power Query Editor** shows the sequence of transformations that have been applied to a query, such as removing columns, changing data types, and filtering rows?

Pick a choice:

- ◯ **Queries pane**
- ◯ **Applied Steps**
- ◯ **Formula Bar**
- ◯ **Data Source Settings**

1 point

8 Which activities are appropriate parts of Exploratory Data Analysis (EDA)? **Select all that apply.**

Pick a choice:

- ◯ **Examining distributions of individual variables**
- ◯ **Examining relationships between variables**
- ◯ **Creating visualizations to identify patterns**
- ◯ **Replacing every missing value with zero automatically**

1 point

9 You want to compare the **average Water Usage across industries and years**, while allowing the user to select a specific region. Which PivotTable setup is most appropriate?

Pick a choice:

- ◯ **Rows: Region; Columns: Water Usage; Values: Industry; Filter: Year**
- ◯ **Rows: Year; Columns: Region; Values: Industry; Filter: Water Usage**
- ◯ **Rows: Water Usage; Columns: Industry; Values: Region; Filter: Year**
- ◯ **Rows: Industry; Columns: Year; Values: Average Water Usage; Filter: Region**

1 point

10 Which information can a **box plot** help you identify most effectively?

Pick a choice:

- ◯ **The distribution, median, quartiles, and potential outliers**
- ◯ **The exact correlation coefficient between two variables**
- ◯ **The causal relationship between two variables**

- ◯ **The exact frequency of every individual value**

1 point

11 An Excel column contains values such as 60, 62, #N/A, 64, and #VALUE!. Which function is most suitable for checking whether a cell contains an error?

Pick a choice:

- ◯ **TRIM**
- ◯ **COUNTBLANK**
- ◯ **AVERAGE**
- ◯ **ISERROR**

1 point

12 A dataset of ESG Environmental scores has the following summary statistics:

- **Mean = 68**
- **Median = 72**
- **Standard deviation = 15**

Which interpretation is **most appropriate**?

Pick a choice:

- ◯ **The data are likely left-skewed because the mean is lower than the median.**
- ◯ **The data are likely right-skewed because the mean is lower than the median.**
- ◯ **The standard deviation indicates that 15% of companies have scores below 68.**
- ◯ **The median indicates that every company has an ESG score of exactly 72.**

1 point

13 A researcher measures the ESG Environmental score of the **same 50 companies** in 2024 and again in 2025. Which statistical test is most appropriate for testing whether the mean score changed?

Pick a choice:

- ◯ **Paired t-test**
- ◯ **Independent two-sample t-test**
- ◯ **One-way ANOVA**
- ◯ **Pearson correlation**

1 point

14 Which statement best describes the main difference between **Pearson correlation** and **Spearman correlation**?

Pick a choice:

- **Pearson measures causation, while Spearman measures correlation.**
- **Pearson is only used for categorical variables, while Spearman is only used for numerical variables.**
- **Pearson measures linear relationships, while Spearman measures monotonic relationships based on ranks.**
- **Pearson can only measure positive relationships, while Spearman can only measure negative relationships.**

1 point

15

You have the following `company_info` table:

company_id	company_name	industry	region
101	ABC Corp	Manufacturing	Bangkok
102	Green Energy	Energy	Chiang Mai
103	Thai Water	Utilities	Bangkok

In the `company_perf` sheet, cell A2 contains `102` . Which formula correctly returns the **Industry** for company 102?

Pick a choice:

- **=VLOOKUP(A2,company_info,2,FALSE**
- **=VLOOKUP(A2,company_info,3,FALSE)**
- **=VLOOKUP(A2,company_info,4,FALSE**
- **=VLOOKUP(A2,company_info,3,TRUE)**
